PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience delivering production internal systems for contract management, billing, management reporting, and banking API integrations. Works across the full stack, from MySQL/PostgreSQL data modeling to React/Next.js interfaces, with PHP and TypeScript at the core, plus Linux deployment, automation, and maintenance of Java/JBoss legacy applications. B2 English. Available for junior full-time employment or contractor engagements, with the autonomy to deliver an end-to-end system from data model to user interface.

TECHNICAL SKILLS

Core: PHP, TypeScript, JavaScript, HTML, CSS.
Daily use: React, Next.js, MySQL, PostgreSQL, Docker, Linux, Git.
Back end & integrations: REST APIs, Webhooks, Node.js, Express, JWT, PHPMailer, Cron, Prisma.
Developing proficiency: Java 7/8, Spring Boot, Angular, Flutter, JBoss EAP 6/7.
Other: PWA, Scrum.

PROFESSIONAL EXPERIENCE

ASSEGO - Associação dos Subtenentes e Sargentos do Estado de Goiás

Development Intern | Jan 2025 - Present | Goiânia, GO, Brazil

- Built a contract management system with multi-step approvals, data modeling, PDF generation, and full change history, replacing a workflow previously handled through spreadsheets and email.
- Delivered management dashboards and financial/administrative reports with combined filters and PDF/Excel exports, enabling teams to access figures without requesting them from IT.
- Integrated Sicoob and Itaú payment APIs for boleto issuance, payment return processing, automatic settlement, and collection workflows; typed API contracts in TypeScript to reduce integration errors.
- Developed a mobile-first PWA for members with Next.js and TypeScript, covering routing, authentication, responsive UI, and offline caching.
- Automated file imports, scheduled reporting, and email delivery with PHPMailer/Cron, removing hours of manual work each month; also maintained Java 7/8 applications on JBoss EAP 6/7, fixed Angular screens, and handled Git/Linux deployment tasks.

JHON CODE - web development agency

Development Intern | Jul 2023 - Apr 2024 |

- Developed custom web systems for multiple clients, covering MySQL data modeling, PHP back-end logic, and JavaScript/HTML/CSS front-end delivery.
- Built admin panels that let clients manage their own content and system routines without developer assistance.
- Implemented password hashing, session-based authentication, and role-based access control, connecting security rules to the application UI.
- Designed database structures and system diagrams before implementation and integrated REST APIs across delivered projects.

FIO GUIA - financial management product for physicians

Development Intern | Jan 2023 - Jun 2023 |

- Contributed to a real financial software product for physicians in a first professional development role.
- Implemented SQL queries and data routines and supported API integrations used by the client application.
- Worked on Flutter screens and application flows, connecting the user interface with integrations and application data.

EDUCATION

Technology Degree in Systems Analysis and Development - Faculdade Senac Goiás (Brazilian college) | Jan 2023 - Jun 2025, completed
Coursework included software engineering, software quality, databases, and agile methodologies.

LANGUAGES

Portuguese: Native.
English: B2 (CEFR), 480 hours at Centro de Línguas da UFG (Brazilian university language center), completed in 2026; lived experience in Germany.

PERSONAL / OPEN-SOURCE PROJECT

freelamanager - github.com/MatheusMorais1234/freelamanager

- Built a full-stack client and contract manager for freelancers with JWT authentication, an Express API, Prisma on PostgreSQL, and a React/Vite front end.
- Maintains Java repositories focused on object-oriented programming and SOLID principles.
