SUMMARY

Full-stack developer with almost two years maintaining production management systems at ASSEGO, used by more than 100 staff and around 9,000 members: contracts, billing integrated with Sicoob and Itaú banks, reporting and a member app. PHP, Laravel, TypeScript, React and Next.js from database to front end. B2 English. Available immediately, on-site in Goiânia (Brazil) or remote.

TECHNICAL SKILLS

Core: PHP, Laravel, TypeScript, JavaScript, React, Next.js, HTML, CSS.
Data and back end: MySQL, PostgreSQL, Node.js, Express, Prisma, REST APIs, Webhooks, JWT, CNAB 240/400.
Infra and tools: Linux, Docker, Git, GitHub Actions (CI), Cron.
Developing: Java 7/8, Spring Boot, Angular, JBoss EAP 6/7, Flutter.

PROFESSIONAL EXPERIENCE

Automatiza ON - business management system for small and mid-sized companies
Full-Stack Developer (partner) | Nov 2026 - present
- Rebuilt a legacy PHP system from scratch in Laravel 12 and PHP 8.2 (currently in testing): clients, proposals, work orders and finance.
- Isolated data per company with Eloquent global scopes and built department-level permissions and change auditing.

StudioSports - registration platform for sports events
Full-Stack Developer (partner) | Aug 2026 - present
- Maintain the live PHP/MySQL system: registrations, price tiers, coupons, pairs and Pix via the Itaú API.
- Built WhatsApp notices (password, SOS, reminders) and the organizer dashboard with finances and live results.
- Ran the security review: admin access control, signed sessions and masked CPF (LGPD).

ASSEGO - Association of Warrant Officers and Sergeants of Goiás
Development Intern | Jan 2025 - Oct 2026 | Goiânia, Brazil
- Integrated the Sicoob and Itaú payment APIs: boleto issuance, payment return processing, automatic settlement and collection workflows, with API contracts typed in TypeScript.
- Built the contract management system (multi-step approval, PDF, change history) and dashboards with PDF/Excel export used by more than 100 staff.
- Built the mobile-first PWA used by around 9,000 members, in Next.js and TypeScript.
- Automated imports, reports and emails (PHPMailer/Cron) and maintained Java 7/8 on JBoss EAP and Angular screens.

John Code - web development agency
Development Intern | Jul 2023 - Apr 2024
- Developed custom web systems for clients, from MySQL to PHP and JavaScript front ends.
- Built admin panels and authentication with password hashing, sessions and role-based access control.

FIO GUIA - financial product for physicians
Development Intern | Jan 2023 - Jun 2023
- First professional role: SQL queries, API integrations and Flutter screens on a real financial product.

PROJECTS (LIVE)

HipocratIA (hipocratia.com.br): My own exam-prep product for health-sector civil service: AI-explained questions (Claude API), mock exams and Mercado Pago subscriptions, on a hand-rolled PHP 8.1 MVC of about 30,000 lines.

FreelaManager (app.matheusmorais.com): Client, contract and payment management: React, Express, PostgreSQL and Prisma, with 95 tests in CI and a live demo.

Bella Napoli (pizzaria.matheusmorais.com): Pizzeria delivery system in PHP and MySQL with a kanban dashboard and table QR codes. Security-reviewed before launch (XSS, CSRF, unauthorized order access).

Payment tools (matheusmorais.com/ferramentas): Pix QR code generator, boleto validator and CNAB bank return file reader, in JavaScript with automated tests.

EDUCATION AND LANGUAGES

Technology Degree in Systems Analysis and Development - Faculdade Senac Goiás (Brazil), completed 2025.
English B2 (CEFR) - UFG Language Center, 480 hours, completed 2026; lived in Germany.
