PROFESSIONAL SUMMARY

Full-stack developer with almost two years maintaining production management systems used by more than 100 staff and a member app used by around 9,000 people: contract management, billing, management reporting and integrations with the Sicoob and Itaú banking APIs. Works across the full stack, from MySQL/PostgreSQL data modeling to React/Next.js interfaces, with PHP and TypeScript at the core, plus Linux deployment, automation and maintenance of Java/JBoss legacy applications. B2 English. Available to start immediately in a junior full-time or contractor role, on-site in Goiânia or remote.

TECHNICAL SKILLS

Core: PHP, TypeScript, JavaScript, HTML, CSS.
Daily use: React, Next.js, MySQL, PostgreSQL, Docker, Linux, Git.
Back end & integrations: REST APIs, Webhooks, Node.js, Express, JWT, PHPMailer, Cron, Prisma, CNAB 240/400.
Developing proficiency: Java 7/8, Spring Boot, Angular, Flutter, JBoss EAP 6/7.
Other: PWA, Scrum.

PROFESSIONAL EXPERIENCE

ASSEGO - Associação dos Subtenentes e Sargentos do Estado de Goiás

Development Intern | Jan 2025 - Oct 2026 | Goiânia, GO, Brazil

- Built a contract management system with multi-step approvals, data modeling, PDF generation and full change history, replacing a workflow previously handled through spreadsheets and email.
- Delivered management systems, dashboards and reports used by more than 100 administrative and finance staff, with combined filters and PDF/Excel exports, so teams no longer had to request figures from IT.
- Integrated the Sicoob and Itaú payment APIs for boleto issuance, payment return processing, automatic settlement and collection workflows; typed API contracts in TypeScript to reduce integration errors.
- Developed the mobile-first PWA used by around 9,000 members, with Next.js and TypeScript, covering routing, authentication, responsive UI and offline caching.
- Automated file imports, scheduled reporting and email delivery with PHPMailer/Cron, removing hours of manual work each month; also maintained Java 7/8 applications on JBoss EAP 6/7, fixed Angular screens and handled Git/Linux deployment.

JHON CODE - web development agency

Development Intern | Jul 2023 - Apr 2024

- Developed custom web systems for multiple clients, covering MySQL data modeling, PHP back-end logic and JavaScript/HTML/CSS front-end delivery.
- Built admin panels that let clients manage their own content and system routines without developer assistance.
- Implemented password hashing, session-based authentication and role-based access control, connecting security rules to the application UI.
- Designed database structures and system diagrams before implementation and integrated REST APIs across delivered projects.

FIO GUIA - financial management product for physicians

Development Intern | Jan 2023 - Jun 2023

- Contributed to a real financial software product for physicians in a first professional development role.
- Implemented SQL queries and data routines and supported API integrations used by the client application.
- Worked on Flutter screens and application flows, connecting the user interface with integrations and application data.

EDUCATION

Technology Degree in Systems Analysis and Development - Faculdade Senac Goiás (Brazilian college) | Jan 2023 - Jun 2025, completed

Coursework included software engineering, software quality, databases and agile methodologies.

LANGUAGES

Portuguese: Native.
English: B2 (CEFR), 480 hours at Centro de Línguas da UFG (Brazilian university language center), completed in 2026; lived experience in Germany.

PERSONAL / OPEN-SOURCE PROJECTS

Payment tools - matheusmorais.com/ferramentas

- Pix payment code and QR generator (BR Code, CRC16), boleto validator (modulo 10/11, FEBRABAN standard) and a CNAB 240/400 bank return file reader that lists payments, credits and rejections and checks the file totals.
- Plain JavaScript running in the browser without sending any data, backed by an automated test suite.

freelamanager - github.com/MatheusMorais1234/freelamanager

- Full-stack client and contract manager for freelancers with JWT authentication, an Express API, Prisma on PostgreSQL and a React/Vite front end.
- Also maintains Java repositories focused on object-oriented programming and SOLID principles.
